Trainer Guide

AUTOMOTIVE ELECTRICIAN

COPYRIGHT: This document is solely for the use of LabourNet and LabourNet Clients. No part of it may be circulated, quoted, or reproduced for distribution without approval from LabourNet.
Foreword

**LabourNet** is a social enterprise that creates sustainable benefits for workers in the informal sector, by taking an end to end solution focused on plugging gaps in the eco-system to the market, to address all the challenges faced by the unorganized sector workforce today. It is observed that there is lot of scope for employment in the automotive sector particularly in vehicle servicing sub sector for candidates who possess the necessary knowledge and skills. In vehicle servicing sub sector there is dearth of trade man power in electrical servicing. To fill this gap this course on Automotive Electrician is created to upgrade the skills of practicing electrician in automotive industry for becoming eligible for higher wages and better standard of living.

This course is designed for the training model known as instructor led. Trainee will be provided the knowledge inputs through lecture either in the classroom or at the garage premises followed by practical training at the center with available facilities and at the garage as on the job training.

This course for automotive electrician is in general aligned Qualification Pack for automotive electricians vide Reference ID: ASC/Q 1408 published by NSDC and covers all the operations carried out by an electrician attending four wheelers on the roads in India. Servicing of technologically advanced four wheelers such as vehicles with automatic systems, transmissions, vehicles with latest technologies pertaining to engine such as fuel cell technology and intelligent navigation and transport systems

This course is designed for up grading the knowledge and basic skills to take up the job of ‘Automotive Electrician’ in ‘Automotive Industry’ sector. All the activities carried out by an automotive electrician are covered in this course. Upon successful completion of this course the candidate will be eligible to work as automotive service technician.

This course is designed to provide the necessary knowledge and skill inputs for a technician to work in an organized and disciplined manner by following safe working practices, good housekeeping, effective communication, documentation and work ethics. Knowledge inputs are provided through interactive lectures and other training methodologies such as demonstration, group discussion, role play and other activities to ensure effective learning. The methodology followed to impart the skill in service and repair of vehicle is ‘practical training’ under guidance. Formative assessment is carried out by the trainer as per the schedule in the assessment guide and summative assessment is carried out by external assessor.

Courseware consists of the following as per NSDC quality guidelines.

- Curriculum
- Trainers Guide
- Participants Guide
- Assessment Guide
- Training Delivery Plan
- Training Aids

**Further Learning Opportunities:**
Upon successful completion of this course the candidate will be eligible for attending advanced courses on Automotive Electrician.
1. Key Competencies

Upon successful completion, the Learners will be able to:

1. Carryout overhauling of engine management system such as fuel cell, remote diagnostics, CRDI, drive by drive, close loop system, etc. following the SOP.
2. Carryout overhauling of braking system such as ABS, etc. following the SOP
3. Carryout overhauling of electrical wire harness such as lighting, ignition and AC system following the SOP
4. Maintain work area clean and tidy
5. Work effectively in a team
6. Follow safety precautions while servicing

| Course Duration |
|-----------------|-----------------|-----------------|-----------------|
| No. of Days     | 30 days         | No. of Hours Per day (hrs) | 4 hrs |
| Total No. Hours (GLH) | 120 hrs         | Theory            | 40 hrs |
| Total No. Hours (Assessment) | 4 hrs         | Practical         | 80 hrs |

*Refer Assessment Guide for actual hours. Maximum 2 hours allotted for Formative Assessment and 2 hours for Summative Assessment.

4. Instructions for Trainee

1. During training all trainees are expected to conduct themselves as per norms and regulations of the company wherein you are undergoing training.
2. Trainees should maintain punctuality in respect of attendance.
3. Trainee should be in the class before the training scheduled time.
4. No leave will be granted to the trainees during training session, except under emergent circumstances.
5. Trainees must put their mobile phone in “Switch Off / Silent” mode during training session inside Theoretical class room and as well as in Practical Lab.
6. Make sure you are neatly attired and presentable at all times.
7. Be attentive in classroom, especially when trainer demonstrates a task/process/work.
8. Always participate in discussion and activities.
9. Always take safety measures and necessary precautions while doing any practical using equipment and tools.
10. Always make appropriate notes, space is provided for the same at the end of each module.
11. Do not hesitate to ask any doubts and questions. Our trainer will help and support you in best possible way.
12. Revise and practice as many times as possible.
13. In case of any clarification, Training Section may be contacted during working hours on working days.
14. Study the activities before the session starts so that your active participation and learning are assured.

Assessment: At the end of the module the trainer should administer test provided by the assessment team as described in the Assessment Guide

Resources:

- Pen
- Instructor
- Practical resources provided by instructor and training center.
4. General Instructions for Trainers

Pre training:

- Trainer is provided with the training content for reference. For e.g. the topics you have to train in this programme.

- Before leaving for the training site Trainer should make sure that the trainees have been informed about the training.

- Trainers should make sure they have route map to reach the training site without any difficulties.

- By any chance if Trainer is getting delayed make sure that he/she should inform the site supervisor that you are getting delayed.

- As soon as the Trainer reaches the training site he/she should meet training coordinator/supervisor (to make sure of the training facilities are available-onsite, offsite).

- Please make sure you have all the required training tools and materials for conducting the training session (learning cards, sketch pens, raw materials etc.).

- Check your training equipments such as laptop, projector and camera, relevant tools (depending on the training site).

- Reach 15 minutes before to arrange for the training session

During the training

- Start the session with an icebreaker to settle the participants for the session.

- Welcome and Recap the previous days learning and clarify the doubts if any.

- Mark attendance for the trainees at the beginning and the end of the training

- Follow the session plan strictly.

- Encourage the trainees to ask questions, explore ideas etc.

Close the session with positive strokes

Specific instructions for Trainers - Course

- Use case stories (live examples) pertaining to the respective course training.

- Stop and check in between the sessions whether the learners are learning!!
Ask the participants to draw a simple action plan with respect to the course to implement the learning’s from the days training programme.

Use current version of the curriculum/training package linked from the Course training manual of LabourNet course page.

Ensure the delivery and assessment strategies are consistent with those outlined in the Course Training and Assessment Strategy

Discover how to Anchor positive states to gestures, words and pictures pertaining to Course trade during the onsite training.

Appropriate paper based document repository with respect to course should be used.

Assess group and individual needs verbally (actively listening) and/or in writing.

Establish trustworthiness with the group.

Establish ground rules and/or reiterate them as needed, modelling and promoting protection of confidentiality, demonstrating consideration for other’s feelings, and acknowledging occasions when trainees may have unintentionally broken a ground rule or offended someone.

Acknowledge in advance possible feelings or differences of opinion that a session may generate.

Trainers should get away from unclear thinking and unclear structure before they start the presentation.

Trainers must communicate effectively with any audience, energy, voice and body to enhance presence, reputation and power.

Become less dependent upon content and script, freeing up your creativity and passion!

Post training:

- Share/Report the observations found in the training site with the concerned person (coordinator/supervisor)

- Record on-going formative assessment results
5. Session Plan for each Module

Module 1- Overview of automotive industry and generic skills

Module Overview

This module covers basic concepts to work as an automotive electrician, generic skills and engineering workplace skills.

Module Objectives

By completing this module the trainee would be able to:

- Explain the evolution and growth of 4 wheeler
- Classify automobile based on
  - Purpose
  - Fuel used
  - Capacity
  - Drive
  - Wheel and axle
  - Suspension
  - Transmission
- Explain the growth of 4-wheeler industry
- Describe the opportunities of automotive electrician in an industry
- Describe role of automotive electrician in an industry
- Communicate effectively
- Listen effectively
- Write a professional resume and applying through various job related portals
- Describe work ethics
- Describe the grooming standards at the work place

Underpinning Knowledge/ Theory/ Principle

- No prior knowledge is required

Instructions to the Trainer

- Follow instructions given in the activity section
- Ensure all the task is done in sequence as given
- Gather all the materials and information required in well advance
- Keep the class energetic and motivated to learn

Tips for Trainer

- Be energetic while introducing yourself to the trainees.
- Be aware of the timing required to complete the activity
- Training materials should be used at the right time and in the right way
- Maintain the flow of the module from start to finish
- Making sure that the Trainees are comfortable and eager to learn.

Activity 1

Objective: To impart knowledge on automotive industry and job related activities as an automotive electrician.

Methodology:

Interactive Lecture covering the following
- Overview on automotive industry
• Classification of automobiles
• Growth of automotive industry
• Roles of automotive electrician

**Material required:** PPT, Paper, Pen and Newspaper

**Outcome:** The trainee will be able to describe the importance and scope of the automotive industry and roles and responsibilities of an automotive electrician.

**Session Plan 2 – Work place skills**

**Session Objectives**

At the end of the session, participants will be able to:

• Communicate effectively
• Listen effectively
• Write a professional resume and applying through various job related portals
• Describe work ethics
• Describe the grooming standards at the work environment

**Slide No.16-33**

---

**Communication Skills**

The basic skills required for people at any workplace are:

- Listening
- Reading
- Speaking
- Writing

---

**Activity 1**

**Objective:** To provide basic information on communication skills and work ethics to the trainees

**Methodology:**

Interactive Lecture covering the following

- Communication: oral and writing
- Reading skills and tips to enhance the reading
- Work ethics and professionalism

**Material required:** PPT

**Outcome:** The trainee will be able to communicate effectively and describe work ethic

**Debrief:**

The trainer will recap by asking one of the participants to the duties of automotive electrician

**Assessment**
1. List out few roles of automotive electrician?

2. Explain different forms of communication?

**Module 2- Carry out electrical and electronic repairs and overhauling of vehicle**

**Module Overview**

This module covers skills required of an individual to carry out repairs and overhauling of electronic and electrical systems of a vehicle.

**Module Objectives**

By completing this module the trainee would be able to:

- Describe Electricity
- Define insulator, conductor, semi-conductor, voltage and atom
- Explain current flow theories
- Describe fuel injection system and its types
- Describe Air Conditioning System
- Explain Steering system
- Explain the working principle of brake system
- Describe Suspension system and its types
- Describe and identify Safety systems in a vehicle
- Identify components in Clutch System
- Demonstrate battery service
- Service starter motor
- Identify and solve trouble shootings in fuses and lighting system
- Demonstrate Servicing of charging system
- Describe A/C system
- Rectify and repair trouble shootings in A/C system

**Underpinning Knowledge/ Theory/ Principle**

- Evolution and growth of 4 wheeler
- Classify automobile based on
  - Purpose
  - Fuel used
  - Capacity
  - Drive
  - Wheel and axle
  - Suspension
  - Transmission
- Growth of 4-wheeler industry
• Role of automotive electrician in an industry
• Communicate effectively
• Listen effectively

- Electricity
- The Volt
- The Ampere
- The Ohm
- The Atom
- Electrical Charges
- Balanced Atoms
- Ion Particles
- Insulators
- Conductors
- Semiconductors

Activity 1

Objective: To provide basic information on electrical and electronics

Methodology:
Interactive Lecture covering the following

- Principle of Electricity and Electronics
- Current flow theories
- Components in Electronics
- Types of diodes and their uses

Material required: PPT

Outcome: The trainee will be able to describe basics of electrical and electronics

Session Plan 2 – Vehicle Management System

Session Objectives

By completing this module the trainee would be able to:

- Describe engine and its functions
- Identify engine components
- Describe fuel injection system and its types
- Describe Air Conditioning System
- Explain Steering system
- Explain the working principle of brake system
- Describe Suspension system and its types
- Describe Safety systems
- Identify components in Clutch System
- Identify and explain the various components in brake system
- Identify Active and Passive safety system in a vehicle

Instructions to the Trainer

- Follow instructions given in the activity section
• Ensure all the task is done in sequence as given
• Gather all the materials and information required in well advance
• Keep the class energetic and motivated to learn

**Tips for Trainer**

• Be energetic while introducing yourself to the trainees.
• Be aware of the timing required to complete the activity
• Training materials should be used at the right time and in the right way
• Maintain the flow of the module from start to finish
• Making sure that the Trainees are comfortable and eager to learn

**Activity 1**

**Objective:** To impart the knowledge on vehicle management system

**Methodology:**

**Interactive Lecture covering the following**

• Engine and its components
• Fuel injection system
• Gear box (Transmission) and its types
• Steering System
• Suspension System
• Safety Systems

**Material required:** PPT

**Outcome:** The trainee will be able to describe functions of various components in vehicle management system

**Activity 2**

**Objective:** To impart the skill on petrol and diesel engine

**Methodology:**

Group Discussion

**Material required:** PPT,

**Outcome:** The trainee will be able to discuss the difference between petrol and diesel engine.

**Activity 3**

**Objective:** To identify and describe the functions of various components of an engine

**Methodology:**

Identification

**Material required:** PPT, Engine and its components

**Outcome:** The trainee will be able to identify and describe functions of various components of an engine.

**Activity 4**

**Objective:** To identify and describe the functions of various components of clutch and gear box system

**Methodology:**

Identification

**Material required:** PPT, Clutch, Gear box and Disassembled components of clutch and gear box

**Outcome:** The trainee will be able to identify and describe the functions of various components of clutch and gear box.
Activity 5

Objective: To identify and explain the functions of various components of a brake system

Methodology:

Identification

Material required: PPT, Charts and demo car

Outcome: The trainee will be able to identify and describe the functions of various components of brake system.

Activity 6

Objective: To identify various active and passive safety systems in the given vehicle

Methodology:

Identification

Material required: PPT, Demo car

Outcome: The trainee will be able to identify various active and passive safety systems in the given vehicle

**Session Plan 3 – Hand tools and Power tools**

**Session Objectives**

At the end of the session, the trainee will be familiarizing:

- With various tools used and its working procedure.
- To identify right tool required for a particular operation.
- With various equipment, feature and its operating/working procedure

**Duration**

<table>

Instructions to the Trainer

- Follow instructions given in the activity section
- Ensure all the task is done in sequence as given
- Gather all the materials and information required in well advance
- Keep the class energetic and motivated to learn

Tips for Trainer

- Be aware of the timing required to complete the activity
- Training materials should be used at the right time and in the right way
- Maintain the flow of the module from start to finish
- Making sure that the Trainees are comfortable and eager to learn.

Slide No. 81-99

Hand Tools

The various hand tools used by an automotive electrician is listed below:

- Screwdriver
- Spanners
- Hammers
- Pliers
- C-clamp
- Feeler gauge
- Battery hydrometer

Activity 1

Objective: To impart the knowledge on Hand tools and power tools

Methodology:

Interactive Lecture on following

- Hand tools
- Power tools

Material required: PPT.
Outcome: The trainee will be able to describe various hand tools and power tools used in an industry by an automotive service technician.

Activity 2

Objective: Identifying various hand tools and power tools.

Methodology: Identification

Material required: PPT, Hand tools and power tools.

Outcome: The trainee will be able to identify various hand tools and power tools.

Activity 3

Objective: To impart the skill to carryout drilling operation.

Methodology: Demonstration

Material required: PPT, portable drilling machine, PPE, sample work piece.

Outcome: The trainee will be able to drill holes in the given work piece using drilling machine.

Activity 4

Objective: To demonstrate testing of battery using hydrometer.

Methodology: Demonstration

Material required: PPT, Hydrometer and battery

Outcome: The trainee will be able to check battery condition using hydrometer.
Session Plan 4 – Repair and Overhaul

Session Objectives

By completing this module the trainee would be able to:

- Describe battery and its importance
- Carry out battery service
- Service starter motor
- Identify and solve trouble shootings in fuses and lighting system
- Service charging system
- Describe A/C system
- Rectify and repair trouble shootings in A/C system

Instructions to the Trainer

- Follow instructions given in the activity section
- Ensure all the task is done in sequence as given
- Gather all the materials and information required in well advance
- Keep the class energetic and motivated to learn

Tips for Trainer

- Be aware of the timing required to complete the activity
- Training materials should be used at the right time and in the right way
- Maintain the flow of the module from start to finish
- Making sure that the Trainees are comfortable and eager to learn.
Activity 1

Objective: To impart the knowledge on electrical systems and components

Methodology:

Interactive Lecture on following

- Battery.
- Starter motor
- Lighting and fuses
- Charging system
- A/C system

Material required: PPT.

Outcome: The trainee will be able to describe importance of electrical systems and components

Activity 2

Objective: To impart the skill on servicing battery

Methodology:

Demonstration

Material required: PPT, PPE, Battery, Charging unit and Hydrometer

Outcome: The trainee will be able to service battery wearing PPE

Activity 3
Objective: To demonstrate servicing of starter motor

Methodology:

Demonstration

Material required: PPT, PPE, starter motor and Spanner.

Outcome: The trainee will be able to service starter motor wearing PPE

Activity 4

Objective: To impart the skills on identifying and repairing faults in fuses and lighting system

Methodology:

Demonstration

Material required: PPT and PPE.

Outcome: The trainee will be able to identify and repair faults in fuses and lighting system

Activity 5

Objective: To impart skills on servicing charging system

Methodology:

Demonstration

Material required: PPT, Alternator, Multi-meter and PPE.

Outcome: The trainee will be able to service charging system

Activity 6

Objective: To demonstrate serving of A/C system

Methodology:

Demonstration

Material required: PPT, PPE and Demo car
**Outcome:** The trainee will be able to service A/C system wearing PPE

**Debrief:**

The trainer will recap by asking the participants to demonstrate the overhauling of electronic and electrical systems of a vehicle

**Module 3- Plan and organize work to meet expected outcome**

**Module Overview**

This module introduces the trainee about planning and organizing an individual’s work in order to complete it to the required standards, on time and within budget in terms of cost and material.

**Module Objectives**

By completing this module the trainee would be able to:

- Maintain work area clean and tidy
- Manage time, materials and cost effectively
- Follow organization’s policies and procedures
- Obtain guidance from seniors when necessary

**Underpinning Knowledge/ Theory/ Principle**

- Evolution and growth of 4 wheeler
- Classification of automobiles
- Growth of 4-wheeler industry
- Role of automotive electrician in an industry
- Communicate and listen effectively
- Electricity
- Insulator, conductor, semi-conductor, voltage and atom
- Current flow theories
- Fuel injection system and its types
- Air Conditioning System
- Steering system
- Working principle of brake system
- Suspension system and its types
- Safety Systems
- Servicing Battery, Starter motor, Charging System, Fuses, Lighting System and A/C system

**Instructions to the Trainer**

- Follow instructions given in the activity section
- Ensure all the task is done in sequence as given
- Gather all the materials and information required in well advance
- Keep the class energetic and motivated to learn

**Tips for Trainer**

- Making sure that the Trainees are comfortable and eager to learn.
- Starting the session with an Energizer
- Be aware of the timing required to complete the activity
- Training materials should be used at the right time and in the right way.
- Maintaining the flow of the module from start to finish.
Activity 1

**Objective:** To impart the knowledge on planning, organizing and its importance

**Methodology:**

**Interactive Lecture**
- Planning
- Planning process
- Organizing

**Material required:** PPT.

**Outcome:** The trainee will be able to describe planning, organizing and its importance at workplace

Activity 2

**Objective:** To demonstrate the importance of Planning, organizing, Policies and Procedures of an organization

**Methodology:**

**Demonstration and Group Discussion on following**
Importance of planning
Importance of organizing
Advantages of planning
Policies and procedures

Material required: PPT

Outcome: The trainees will be able to demonstrate the importance of planning, organizing, policies and procedures of an organization.

Activity 3

Objective: To demonstrate planning process used in an organization

Methodology:
Demonstration

Material required: PPT

Outcome: The trainees will be able to carry-out planning for a particular operation in an organization

Debrief:

The trainer will recap by asking the trainees to

Assessment

1. What is planning and list out its advantages?

2. List the different type of planning you come across in automotive service facility.

3. Write a note on organizational skills.

Module 4 - Work effectively in a team

Module Overview

This module introduces the trainee about working effectively with colleagues, either in own work group or in other work groups within organization.

Module Objectives

By completing this module the trainee would be able to:

- Follow clear communication with colleagues
- Plan and coordinate with colleagues
- Work effectively in a team
• Follow organization’s policies and procedures
• Work with colleagues for achieving team objectives

**Underpinning Knowledge/ Theory/ Principle**

• Evolution and growth of 4 wheeler
• Classification of automobiles
• Growth of 4-wheeler industry
• Role of automotive electrician in an industry
• Communicate and listen effectively
• Electricity
• Insulator, conductor, semi-conductor, voltage and atom
• Current flow theories
• Fuel injection system and its types
• Air Conditioning System
• Steering system
• Working principle of brake system
• Suspension system and its types
• Safety Systems
• Servicing Battery, Starter motor, Charging System, Fuses, Lighting System and A/C system
• Manage time, materials and cost effectively
• Organization’s policies and procedures

### Instructions to the Trainer

- Follow instructions given in the activity section
- Ensure all the task is done in sequence as given
- Gather all the materials and information required in well advance
- Keep the class energetic and motivated to learn

### Tips for Trainer

- Be energetic while introducing yourself to the trainees.
- Be aware of the timing required to complete the activity
- Training materials should be used at the right time and in the right way
- Maintain the flow of the module from start to finish
- Making sure that the Trainees are comfortable and eager to learn.

### Slide No. 152-161

Activity 1

**Objective:** To provide knowledge on team work, effective communication and its importance
Methodology:

Interactive Lecture

- Planning and coordination
- Team work
- Communication skills
- Policies and Procedures

Material required: PPT, Paper and Pen

Outcome: The trainee will be able to explain the importance of team work and effective communication

Activity 2

Objective: To discuss the importance of team work at workplace

Methodology:

Group Discussion and Role Play on following

- Importance of team work
- Advantages of working in a team

Material required: PPT

Outcome: The trainees will be able to discuss the importance of team work at workplace

Activity 3

Objective: To discuss the importance of planning and organizing to achieve targets and deadlines

Methodology:

Group Discussion and Role Play on following

- Planning and Organizing

Material required: PPT

Outcome: The trainees will be able to discuss the importance of planning and organizing

Debrief:
The trainer will recap by asking participants to explain the importance of team work and effective communication

**Module 5-Maintain a healthy, safe and secure working environment**

**Module Overview**

This module is about monitoring the working environment and making sure it meets requirements for health, safety and security.

**Module Objectives**

By completing this module the trainee would have gained knowledge about:

- Follow organization’s current health, safety, security and environmental policies and procedures
- Define hazard
- Describe various hazards and safety precautions to be followed while servicing
- Follow organization’s emergency and disaster management procedures
- Identify and recommend opportunities for improving health, safety and security

**Underpinning Knowledge/ Theory/ Principle**

- Evolution and growth of 4 wheeler
- Classification of automobiles
- Role of automotive electrician in an industry
- Communicate and listen effectively
- Electricity
- Insulator, conductor, semi-conductor, voltage and atom
- Current flow theories
- Fuel injection system and its types
- Air Conditioning System
- Steering system
- Working principle of brake system
- Suspension system and its types
- Safety Systems
- Servicing Battery, Starter motor, Charging System, Fuses, Lighting System and A/C system
- Manage time, materials and cost effectively
- Organization’s policies and procedures
- Plan and coordinate with colleagues
- Team work
- Organization’s policies and procedures

**Instructions to the Trainer**

- Follow instructions given in the activity section
- Ensure all the task is done in sequence as given
- Gather all the materials and information required in well advance
- Keep the class energetic and motivated to learn

**Tips for Trainer**

- Be energetic while introducing yourself to the trainees.
- Be aware of the timing required to complete the activity
- Training materials should be used at the right time and in the right way
- Maintain the flow of the module from start to finish
- Making sure that the Trainees are comfortable and eager to learn.
Health and safety

A hazard is a situation that poses a level of threat to life, health, property, or environment.

Automotive jobs in the workshop involve—adjusting wheel alignment, checking engine performance, checking charging systems, adjusting engine valves and many other jobs. These jobs do include variety of hazards each day, from contact with hazardous chemicals to the possibility of amputating limbs or digits with mechanical equipment.

Activity 1

Objective: To impart the knowledge on maintaining health, safety and security at workplace.

Methodology:

Interactive Lecture followed by group discussion

- Personal protective equipment (PPE)
- Non-authorized / restricted areas
- Protective safety requirements
- Hazards and safety from machinery

Material required: PPT and PPE

Outcome: The trainee will be able to explain the importance of maintaining health, safety and security at workplace.

Activity 2

Objective: To demonstrate the evacuation process in case of any health threat at workplace.

Methodology:
Demonstration

Material required: PPT and PPE

Outcome: The trainee will be able to carry-out the evacuation process of any health threat at workplace

Activity 3

Objective: To demonstrate wearing of PPE.

Methodology:

Demonstration

- Demonstration will take place in classroom

Material required: PPT and PPE

Outcome: The trainee will be able to use PPE effectively

Activity 4

Objective: Identification of safety and hazard signs

Methodology: Each trainee will be asked to explain one of the hazard signs

Material required: Various safety and hazards signs.

Outcome: Identify hazards and safety signs at work and determine the appropriate safety measures that should be followed to avoid any accidents.

Debrief:

The trainer will recap by asking participants to explain the importance of maintaining health, safety and security at workplace
