# Presentation System

The Audio - Visual Presentation System

DELHI ■ MUMBAI ■ BANGALORE ■ HYDERABAD ■ CHENNAI ■ KOLKATA ■ VADODARA

## Presentation System - The Audio-Visual Presentation System

The India presentation system is a full fledged bar coded system that covers all categories of vehicles, from two wheelers to trailers, from rural roads to express highways to no roads, from bullock-carts to the latest high speed vehicles. This system is protected by a dongle which will allow it to operate only if is inserted in the USB slot and will prevent any action to download or copy the presentation.

Each trainer has a training manual with which he uses a bar code reader. The advantage of this is the fact that it gives the trainer the ability to respond to the demands of the trainees, even it means a small deviation from the topic in hand !

Inbuilt in this system, we have something like approximate 3500 pictures and 70 videos on Indian road safety scenario, We have covered new technologies like; braking systems- disc brakes and drum brakes, ABS and ordinary brakes, vehicle dynamics, braking distances,

safety features-air bags and seat belts, anti skidding systems or traction control, the effect of alcohol on drivers, the use of mobile phones while on the road, the use of helmets on a two wheeler, the use of the front and rear brakes on a two wheeler.

## The sectionized training module

It is divided into 6 parts. It begins with the basics that are necessary for any kind of road user and then moves onto other specific vehicles starting from two wheelers then moving onto Light Motor Vehicles, the a step further to Heavy Transport Vehicles and Heavy Passenger Vehicles and articulated vehicles and then to special vehicles like transit mixture carriers and Hazardous Chemical carriers.

It is a comprehensive manual and has all data and information that will be required by the trainer. Every photograph and video is bar coded to allow for flexibility and a detailed explanation for each of these is given below the photograph.

The presentation system is also designed such that it can be operated without the bar coding system.

We also have a number of pages dedicated to only the dynamics of a vehicle, a topic not much understood by most drivers.

Another feature of the manual is the video file

that it contains. We have video of very high impact for "shock treatment" to make the drivers realize the damage that can be done and also on how to avoid such situations and escape from them.

## Basic :

**Duration** - 1 day

**Types of vehicle** - All

**For** - Executives / Drivers / Chauffeurs

### Class-room theory content

- Introduction
- Traffic control devices
- Rules of the road & defensive driving
- Different type of road users

## LMV :

**Duration** - 1 day for each module ; **For** - Executives / Drivers / Chauffeurs

### LMV Basic Module

- The responsible driver
- Need for vehicle knowledge & maintenance
- Breakdown/Accidents/Towing
- First aid

## Two Wheelers

**Duration** - 1 day

**For** - Executives

### Class-room theory content

- The responsible rider
- Bike knowledge
- Defensive riding
- Difficult conditions & hazard perception

### LMV-1 Module

- Vehicle dynamics
- Driving in difficult conditions
- Hazard perception
- Emergencies

### LMV-2 Module

- Vehicle technique and maintenance

### LMV-3 Module

- Softskills for Chauffeurs

## HTV :

**Duration** - 1 day for each module ; **Types of vehicle** - HTV/Haz-Chem drivers

### HTV Basic Module

- The responsible driver
- Loading procedure
- Need for vehicle knowledge & maintenance
- Breakdown/Accidents/Towing
- First aid

### HTV -1 Module

- Vehicle dynamics
- Defensive driving
- Driving in difficult conditions
- Hazard perception
- Emergencies

### HTV-2 Module

- Vehicle knowledge

## HPV :

**Duration** - 1 day for each module ; **Types of vehicle** - HPV (Bus drivers)

### HPV Basic Module

- The responsible driver
- Need for vehicle knowledge & maintenance
- Breakdown/Accidents/Towing
- First aid

### HPV-2 Module

- Vehicle knowledge
- Eco friendly driving

### HPV-3 Module

- Softskills

### HPV -1 Module

- Vehicle dynamics
- Defensive driving
- Driving in difficult conditions
- Hazard perception
- Emergencies

### HPV-4 Module

- Role of Conductor

### Low Floor Bus

- Need for vehicle knowledge & maintenance
- Emergencies
- Do's and Don'ts

## Safe driving training kits:

### Driving schools kit :

- Presentation System
- Trainer manual
- E-learning

### RTO Kit :

- Video's on road safety with slogans
- Theory testing system for learner licence
- Driving test with P-Drive for permanent licence

### Franchisee kit :

- Train the trainer program
- Presentation System(complete)
- Trainer manual
- Safe driving books
- Online administration system
- E-learning

### Schools kit :

- Presentation System - Basic
- Safe driving books
- E-learning

### Zara Sochiye kit :

- Train The Trainer Program
- Trainer booklet
- DVD of presentation
